Our History

1923

Gertrude Christensen, the Great Aunt of Fraser and Fraser's current Partners, set up her own firm to support lawyers in their genealogical research.

1969

Nathan and Simon Fraser developed the business into an independent, family run Partnership off the back of Gertrude's work, improving research speeds considerably.

2007

Sons of Nathan and Simon, Andrew, Charles, Neil and Philippe Fraser, become the new partners, bringing the business forward and integrating modern technology and classic research methods.

2015

Andrew and Neil Fraser have taken care of the day-to-day running of the firm.

2019

The firm celebrates its 50th anniversary as a partnership

Overview

Fraser and Fraser provide specialist research to the legal professions by tracing missing heirs and beneficiaries to unclaimed estates worldwide.

| Why use probate researchers?

| Awards
